

# Notice of Seismic Performance: MATAURA STATION AND PLATFORM

## ISA (Initial Seismic Assessment) Results:

Engineers have completed an Initial Seismic Assessment (ISA) and have found that this building has an overall capacity of <33% of New Building Standard (NBS) and is considered to be a Potentially Earthquake Prone Building.

We are currently evaluating options for this site and will be in discussion with relevant stakeholders as part of this process.

The safety of the staff and public who use the building is a top priority.

If you have any concerns, please contact the Helpdesk **0800 226 700** and quote **Asset 1223/1726**.
